Professional Affiliations : American Society of Nephrology, International Society of Nephrology, Renal Physicians Association, American Medical Association

In school, I always enjoyed learning about biology and the human body and I knew that I wanted to be able to help others in my future career.

The thing that I love about my patients most is learning about their lives and getting to know people from all walks of life.

My philosophy of care is that every encounter someone has with the health care system should be patient-centered, above all else.
